REVIEW / SYNTHÈSE

D.J. Kushner, Alison Baker, and T.G. Dunstall Pharmacological uses and perspectives of heavy water and deuterated compounds 79

ARTICLES

J.A. Scott and D.G. McCormack Nonadrenergic noncholinergic vasodilation of guinea pig pulmonary arteries is mediated by nitric oxide 89

Ana Díez-Sampedro, Elena Urdaneta, M. Pilar Lostao, and Ana Barber Galactose transport inhibition by cytochalasin E in rat intestine in vitro 96

Isam Abu-Amarah and Richard J. Balment Vascular, renal, and endocrine responses to low-dose atrial natriuretic peptide in the fluid-balanced New Zealand genetically hypertensive rats with and without endogenous arginine vasopressin 102

Manuela Criado, Olga Flores, Froilán Hidalgo, José M. López-Novoa, and Angel Sánchez-Rodríguez Interaction between prostanoids and nitric oxide in the control of tubular function in rats with chronic bile duct ligation 111

Jaber Emami, Hertzel C. Gerstein, Franco M. Pasutto, and Fakhreddin Jamali Insulin-sparing effect of hydroxychloroquine in diabetic rats is concentration dependent 118

Stephen D. Milone, Gary E. Newton, and John D. Parker Hemodynamic and biochemical effects of 100% oxygen breathing in humans 124

Steven Y. Wang, Nairne W. Scott-Douglas, Dante E. Manyari, and John V. Tyberg Arterial versus venous changes in vascular capacitance during nitroprusside infusion: a vascular modelling study 131

BRIEF REPORTS / RAPPORTS BREFS

Tamas Zakar, Jane E. Mijovic, Damyanti Bhardwaj, and David M. Olson Tyrosine kinase inhibitors block the glucocorticoid stimulation of prostaglandin endoperoxide H synthase expression in amnion cells 138

W.P. Pimenta and J.A. Silva Veiga Increased glucose synthesis in renal tubule fragments from hyperthyroid rats 143

Abstracts of the 31st Winter Meeting of the Canadian Physiological Society / Résumés de la 31e session d'hiver de la Société canadienne de physiologie

A.A. Al-Majed, T.M. Brushart, and T. Gordo Anterograde activity of motoneurons enhances the number and accuracy of axonal regeneration in rat femoral nerve Ai

D.G. Behm and J. Fitzgerald Effect of high intensity resistance on muscle activation Ai

J.G. Boyd and T. Gordon Dose-dependent effects of brain-derived neurotrophic factor on motor axon regeneration Aii

Catherine B. Chan and Justin J. Surette Leucine but not arginine ameliorates glucose refractoriness in isolated β-cells from *fa/fa* rats Aii

J. Diamond, M. Holmes, and E. Pertens Nerve repair mechanisms are seriously compromised in apoE knockout mice Aiii

T.A. Doucette and R.A.R. Tasker Does neonatal surgical stress alter physical and neurobehavioural development in rats? Aiii

Gilles R. Dubé and Kenneth C. Marshall Testing of metabotropic glutamate inhibition of excitatory postsynaptic potentials in mGluR4 knockout mice Aiv

Molly T. Kibenge, Karen Van Lunen, and Catherine B. Chan Effects of daily swimming on glucose tolerance and insulin secretion: interactions with dietary fat Av

Bruce Mathieson, Mark Marshall, and Paul E. Neumann Immunohistochemical characterization of medial preoptic neurons in DBA/2J and C57BL/6J mice Avi

S.F. O'Brien, S.E. Graham, and J.C. Russell Modulation of insulin resistance in the JCR:LA-cp rat Avi

F.J.R. Richmond, K. Singh, and B. Corneil Structural and functional specialization in the simian neck-muscle system Avii

J.S.R. Ryan, M.E.M. Kelly, and W.H. Baldridge Actions of purines on ion channels and cytosolic $[Ca^{2+}]$ in rat retinal pigment epithelial cells Avii

Bruce N. Van Vliet and Jean-Pierre Montani Effect of the baroreflex control of heart rate on an indirect index of left ventricular oxygen consumption Aviii

M.D. White and M. Cabanac The relationship between core temperature thresholds for hyperpnea and eccrine sweating in exercising humans Aviii
